CampusEats

CS543 Web Services — Group 20

Consolidated submission overview for Assignments 01–06

Project overview

CampusEats is a campus food-ordering system connecting students and staff with food vendors. Users can browse menus, place orders, and track order status. Vendors manage menus and order fulfilment, while administrators oversee users, vendors, and platform operations.

Team details

Team member	Roll number	Role
Daxit Maniya	20251651054	Team leader / backend
Ethasam	20251651038	Protocol / API engineering
Gulshan Kumar	20251651040	QA and testing

Assignment index

Assignment 1 — HTTP by Hand & Project Setup
System brief, HTTP request/response log, and browser network analysis.

Assignment 2 — System design and data schema
Design document, SQL schema, and editable service/schema diagrams.

Assignment 3 — SOAP/WSDL integration
Integration documentation, partner WSDL, SOAP request/response and fault examples.

Assignment 4 — Service architecture and integration
Architecture, service boundaries, schema, integration documentation, and request evidence.

Assignment 5 — HTTP methods and headers
CampusEats Orders REST API, OpenAPI contract, tests, and request transcript.

Assignment 6 — Status codes, errors, and validation
Validation and error handling, Problem Details responses, OpenAPI contract, tests, and transcript.

Repository

GitHub: https://github.com/maniyadaxit/Group20

The repository retains the existing folder name “Assignemet 2” to avoid breaking existing paths.

Running Assignments 5 and 6

Each assignment is a separate Flask application with its own requirements.txt. Run one service at a time from its folder:

```
python3 -m venv .venv
source .venv/bin/activate
```

```
python -m pip install -r requirements.txt
python app.py
```

In a second terminal, activate the same environment and run `pytest -q`. Refer to the assignment NOTES.md and openapi.yaml for endpoints and port. Verify the test results locally before submission.

Demonstration video

Google Drive link: TO BE ADDED. Upload the working demonstration and set General access to “Anyone with the link”. Add the final shareable URL here and verify it in a private browser window before submitting.

Final submission checklist

• Review the exact requirements for Assignments 1–6 and confirm every qusec.P t eesplremenedg.

• uon andrsecrdy the test results for Assignments5n and6g.
